

Kolpak's **WISE** program gets a walk-in up and running in no time

Features & Benefits:

For over 40 years Kolpak has manufactured dependable, energy-efficient walk-ins for the foodservice industry. We know how important it is to get the installation done right the first time.

With a team of factory employed service technicians and factory-trained partners from across the United States and Latin America, we take over the installation process, eliminating the guess work in walk-in panel and refrigeration setup. When an installation is done correctly, the life of the walk-in is increased, utility costs are lowered, and you get years of trouble-free operation.

WISE: Walk-in Installation and Service Experts
